

UMAIR ALI

MEAN / MERN Stack Developer · Angular · React / Next.js · Node.js · MongoDB

📍 Remote (Pakistan) ✉ omairalyee@gmail.com 📞 +92 333 6263167 🔗 linkedin.com/in/umair-ali-0607b6180

PROFESSIONAL SUMMARY

Senior software engineer specializing in **Angular** and **React**, with strong full-stack capability across **Node.js REST APIs** and SQL. Lead developer experienced in scalable frontend architecture, design systems, performance optimization, and accessible (WCAG) UI. Comfortable owning features end-to-end and leading multi-developer teams to ship production products across FinTech, recruitment, and digital-agency domains.

TECHNICAL SKILLS

Frontend	Angular (zoneless, signals, standalone), React, Next.js, TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, Tailwind CSS, Responsive & Accessible (WCAG) UI, Design Systems
Backend	Node.js, Express, REST API design, JWT Authentication, MongoDB, SQL (MS SQL)
Also worked with	C# / .NET Web API (working knowledge), ElectronJS
Tools & Workflow	Git, CI/CD (Bitbucket Pipelines), AI-assisted development (Claude Code, Cursor), Agile / code review

EXPERIENCE

Full Stack Developer — Xenex Media

Remote · Mar 2022 – Present

Digital agency delivering web, app, and branding solutions for global clients.

- Lead frontend architecture and delivery across multiple concurrent products, coordinating a team of 15+ developers.
- Architect modern web apps in Angular (zoneless change detection, signals, standalone components) and React / Next.js for better performance and maintainability.
- Built and standardized a reusable design-system component library, cutting UI development time on new features.
- Improved app performance through lazy loading, OnPush change detection, and an efficient data-caching layer.
- Build full-stack features end-to-end — Node.js / Express REST APIs backed by MongoDB with JWT authentication — powering Angular and React / Next.js client apps.

Software Engineer — DirectFN

Lahore, PK · Feb 2020 – Feb 2022

FinTech provider of market-intelligence platforms for banks & brokerages across MENA and South Asia.

- Migrated a legacy desktop application to a modern web-based client portal, integrated with a Node.js backend for scalability.
- Built responsive, data-intensive financial interfaces handling real-time market data.
- Improved application performance and code quality through optimization and structured code reviews.

Frontend Developer — Apply4U

Multan, PK · Oct 2017 – Feb 2020

Social recruitment platform connecting candidates with recruiters.

- Re-platformed the product from legacy technology to a modern Angular stack with a responsive, mobile-friendly UI.

- Improved usability and load performance, contributing to higher user engagement and conversions.

EDUCATION

Master of Computer Science (MCS)

COMSATS Institute of Information and Technology ·
2015 – 2017
